

December 18, 2025: On Experiencing Sensory Rape by the Tools of the American Police State

As shown in the previous posting, there is a 'chamber' located between Perception and Experience that is titled 'Directed Energy (Designated Aim)'.

I am documenting publicly and experiencing privately that the United States government, as run by Donald Trump and the Republican Party, is using the psychological warfare technique of acoustic agitation to 'forcefully insert' its own 'seeds of impetus' into my 'private home and personal chamber'.

I am documenting, without exaggeration, that the government is acting in a forceful sensory rape against my life in an ongoing and persistent manner.

I am documenting publicly and experiencing privately that the USA police-state is currently coordinating criminals to engage in sensory rape of my perception and experience in America.

I am documenting publicly that the purpose and reason for this sensory rape is for the defense of Donald Trump's ongoing criminal conspiracy to illegally spy on American citizens to suppress their legal rights, religious research, and political speech.

I am engaging in the necessary actions of a man defending his family from the ongoing abuse of a President of the United States of America that has no regard for the rule of law or any higher power or standard by which he should regulate his own conduct.

This sensory rape has been ongoing since, at least 2022, and began becoming harmful to our property when our vehicle began experiencing intentional damage. Since that time, I have continued to distance myself from the Trump team and they have continued to forcefully intrude into my life, both publicly and privately.

To anyone thinking about engaging in business or politics with Donald Trump, I am firmly warning you: Donald Trump is attempting to create and hold human slaves.
